# Perceptions

## Perceptions Summary

**Problem Statement 1:** The BCTAL faculty mindset needs to transition from focusing exclusively on the passing of end-of-course Industry-Based Certification exams and toward assisting their students with becoming a program completor, which includes multiple course completion and earned certification.

**Root Cause 1:** Recent changes in the state's definition of CCMR Readiness have necessitated this shift in focus to better align with new graduation and readiness standards.

**Problem Statement 1 Areas:** Student Learning

**Problem Statement 2:**

The following data were used to verify the comprehensive needs assessment analysis:

## School Processes & Programs

**Problem Statement 1:** The school administration is responsible to develop teacher pedagogy and the concept of Continuous Improvement to improve student academic achievement. **Root Cause:** A significant number of BCTAL teachers transitioned directly from industry roles without formal educational training, resulting in a need for targeted professional development in pedagogy and instructional strategies.

**Evaluation Data Sources:** The percent of students experiencing success on industry-based certifications. Assessments were used and percent of students increased from pre to post-test.

### Strategy 1 Details

**Strategy 1:** Teachers will administer formal and informal progress checks to indicate the levels of student readiness for their certification exam.

**Actions:** 1. Provide the time and place for teachers to administer a mock exam.

a. Create a testing environment that matches the environment in which the actual certification test will be given.

b. Allow teachers to field trip students for the purpose of the mock (see item a)

2. Using all available certification resources, teachers will monitor progress for each indicator for each certification exam.

**Staff Responsible for Monitoring:** Principal, lead teachers, CTE administrators
